

# 36<sup>th</sup> Biennial Conference on Agglomeration

November  
17-20, 2019

The Francis Marion Hotel  
Charleston, South Carolina

## Proceedings

“Computational Modeling of a Litter Agglomeration Process  
using a Discrete Event Approach”  
Don Swatling - Clorox

“Usage of Organic Binders in the Agglomeration of Mineral Fines:  
Ore, Dust, Iron Ore Fines”  
Willy Cilengi - BASF, South Africa

“Raw Material Consistency  
and the Impact on Stiff Extrusion”  
Mac Steele - J.C. Steele & Sons

“RiB Technology: Latest Advancements”  
Erick Bubniak - Diproinduca

“Cold Strength and Hot Disputes”  
Aitber Bizhanov - JC Steele & Sons

“Starch Binding”  
Jeremy Iwanski - Tate and Lyle

“Characterization of Iron Oxide Pellets used in the  
Production of Iron and Steel”  
Thomas Battle

“Achieving Enhanced Coal - Like Properties  
from Torrefied Biomass Using the ONYX Binder System”  
Tim Hagen - NRRI

“Gravimetric Feeders - the Achilles’ Heel  
of Continuous Wet Agglomeration Processes”  
Dr. Greg Mehos - University of Rhode Island

Institute for  
Briquetting and  
Agglomeration

# Table of Contents

IBA Members.....	3
Conference Program .....	4
“Computational Modeling of a Litter Agglomeration Process using a Discrete Event Approach” - Don Swatling – Clorox .....	10
“Usage of Organic Binders in the Agglomeration of Mineral Fines: Ore, Dust, Iron Ore Fines” - Willy Cilengi – BASF, South Africa .....	25
“Raw Material Consistency and the Impact on Stiff Extrusion” - Mac Steele – J.C. Steele & Sons .....	77
“RiB Technology: Latest Advancements” - Erick Bubniak – Diproinduca .....	93
“Cold Strength and Hot Disputes” - Aitber Bizhanov – JC Steele & Sons .....	99
“Starch Binding” - Jeremy Iwanski – Tate and Lyle .....	108
“Characterization of Iron Oxide Pellets used in the Production of Iron and Steel” - Thomas Battle .....	129
“Achieving Enhanced Coal – Like Properties from Torrefied Biomass Using the ONYX Binder System” - Tim Hagen – NRRI .....	142
“Gravimetric Feeders – the Achilles’ Heel of Continuous Wet Agglomeration Processes” - Dr. Greg Mehos – University of Rhode Island .....	168
