

# IBA

# INSTITUTE of BRIQUETTING and AGGLOMERATION

## CALL FOR PAPERS

Do you have a case study, technical article, success story or paper you would like to share?

## Topics Will Include:

Research Fundamentals

Equipment & Process Controls

System Performance Analysis

Practical Applications

Environmental Benefits

## IBA CONFERENCE / NASHVILLE / SEPT 29 – OCT 2

It's not too early to submit an abstract for the 38<sup>th</sup> biennial Conference this fall in Nashville, Tennessee.

The IBA Conference is a great event for both newcomers and veterans to the industry. Join us in a wide variety of discussion crossing multiple industries.

Every effort is made to keep the IBA informal so that contact between members may be relaxed, easy and therefore, especially rewarding on the earnest pursuit of knowledge concerning all aspects of competition and agglomeration.

## What does the IBA Conference Comprise of?

Over 20 presenters covering topics including Wet Pelletization of Carbon Black, Strategies for Modern Battery Production, Metallurgical Characterization of Cold Agglomerated Briquettes made with Hematite based Iron Ores from South Africa, and many more.

Vendors Night which includes multiple Industry Leaders showcasing their technology with appetizers and cocktails.

Presidential dinner.

Round table discussion.

---

*Join us at the award-winning Loews Nashville  
Hotel at Vanderbilt Plaza.*

## WHY AGGLOMERATE?

Agglomeration processes yield a product that has a higher bulk density, contains less dust, and has improved flowability.

Before

After

## NEAL RICE AWARD

Established in 1977 honoring Neal Rice, a Founder of the IBA and its Secretary and Treasurer from 1949 to 1977. The Neal Rice award is awarded to the author of the paper judged to have the most excellent technical content and presentation at each biennial conference.

## INSTITUTE OF BRIQUETTING AND AGGLOMERATION

The **Institute of Briquetting and Agglomeration** is a group of business and technical people interested and involved in the research, development and production of briquets, pellets and other densified products and the equipment to produce them. The IBA looks to achieve the following objectives:

To promote the free exchange of information relating to the processing of a broad range of materials by varied agglomeration techniques.

To provide mutual assistance in problem solving.

To spread the knowledge of size enlargement arts and sciences, briquetting, pelletizing, granulating and extrusion of powder and bulk materials.

To encourage education in these arts and sciences.

To promote study and research of problems relating to them in the advance and mutual interests of its membership.
